# Self-Watering

★ Denotes "Drop in" Item

Our EZ Care containers are perfect for gardeners of all skill levels, from novice to expert gardener. Our patent pending self-watering design affords consumers the opportunity to water and walk away. With the help of growing experts in the industry, we have perfected the ideal soil-to-reservoir ratio, resulting in a plant that is neither over-watered nor under-watered. Growers are also able to benefit from utilizing these containers. The extended shelf life of the plants in these containers (some breeds lasting three times as long vs. standard grower containers) leaves displays looking beautiful longer and results in less markdowns at the store level.

# Thermoform

TVI has recently expanded our offerings by venturing into thermoformed planter production. We are able to produce a broad assortment of colors along with full color printing. We also are able to "orient" our printing process to better accommodate tags and other signage. While most printing processes are random, oriented printing ensures that the tag slot falls in the same spot each time.
